

Are rugs safe to put over hardwood floors?

There are FOUR chemical reactions that can damage your floors.

Moisture Trapping

Produces mold and warps floor.

UV Light Reactions

Uneven discoloration over time.

Plasticizers

Leave stains or sticky residue.

Off-Gassing

Haze or dull the floor's surface.

To avoid these issues reactions we suggest...

INSTEAD OF

USE

VINYL

RUBBER

LINEN

JUTE
